COLORBARS

by GHOST ft. Fukase V4 English

Uploaded at Youtube on February 28, 2016

Oh, the world's signing off
The second hour tells your audience you've had enough
And all the colors of my loneliness arranged across the screen
I think your audience has seen enough-h-h-h-h
Oh yes, your audience has seen enough

Oh, the world's gone silent
Here's to loving life!

Soon we'll televise our C-O-L-O-R
Now, leave me blinded and erase my memories
Soon you'll be a part of C-O-L-O-R
We leave you nauseous and it changes everything

And in a moment you will notice nothing's quite the same
When my COLORBARS are mixing frequencies
Turn the signal down and spin around in the opposite direction
And now, will you please applaud?

Turn the volume up, folks
Listen to the words I say, now
You're a fucking idiot
And static's pouring out of your mouth

There's nothing here for you to see
For you to see, to see you
There's nothing here

Oh, the days are getting shorter
There's a voice inside my head that says you've had enough
(And now you'll turn your eyes towards the screen)
See, all the limits of the televised have gone erratic
(Oh yes, now turn your eyes and scream)

I'm already here
For you to see, for you to see, to see you
I've always been here
For you to see, for you to see, to see you

I've lost control of my imagination
Tell me a solution
It's sweeping 'across the nation
Finally, I-
My imagination
Tell me a solution
It's sweeping 'across the nation
Finally

Soon we'll televise our C-O-L-O-R
Now, leave me blinded and erase my memories
Soon you'll be a part of C-O-L-O-R

We leave you nauseous and it changes everything

I'm already here
For you to see, for you to see, I see you
I've always been here
For you to see, for you to see, I see you

And in a moment you will notice nothing's been the same
Now your fucking lies are mixing frequencies
Turn the signal down and spin around in the opposite direction
And now you will applaud!

For you to see, to see you
For you to see, to see you
For you to see, to see you
For you to see, I see you
